Transcendent Reality

"an admirable principle"

ecoinnovate

A new era of energy

Business opportunity

Mariposa ecoinnovate: Leading the way with renewable energy solutions.

Addressing environmental protection issues, we promote that conversion to renewable energy is an urgent national priority. If we want our energy future to be better, we must change our perspective.

Mariposa a pioneer in the renewable energy industry sector. Our unwavering commitment to powering communities across Canada, now fully focused on the energy transition. No company has the unique combination to define what's next, although there are existing renewable energy solutions that have consistently improved over the years. As we answer the call with renewed purpose and vigor, we are moving our ecoinnovate by Mariposa division rapidly forward. Together, with our customers and supplier partners, we will chart the course to a much better future for Canada.

Our mission is embedded in our slogan "Making a measurable difference". We retain our treasured birthright, "Mariposa," in our name as an enduring and hard-earned badge of quality and ingenuity.

RENEWABLE ENERGY

1 Mariposa Wind

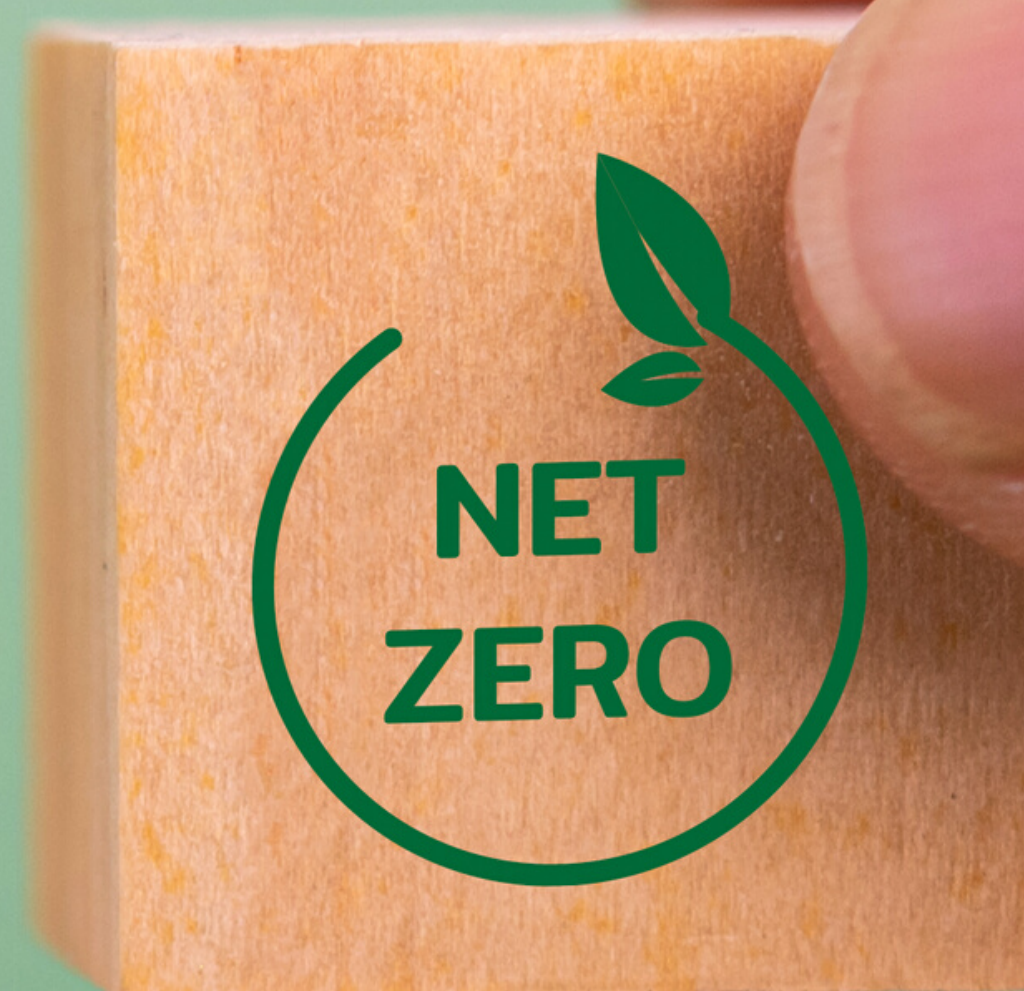

2 Mariposa Hydrogen

3 Mariposa Solar

It's time to

GO GREEN

- solar energy
- biomass energy
- hydrogen energy
- geothermal energy
- wind energy
- tidal energy

“If we act now, we can as responsible Canadians can effectively address the climate crisis and provide more efficient energy solutions, while also making energy affordable, and more reliable and widely accessible for both residential and commercial property owners. Let’s together make a measurable difference.”

- Adriano Conti, CEO of
Mariposa Group Canada

The ultimate solution of HYDROGEN

A message from Mariposa's CEO

"I'm proud to be leading our company's ecoinnovate initiatives that consist of so far over 70,000 renewable energy projects worldwide. As co-founder of ecoinnovate by Mariposa, I am also proud of being a Canadian, which to me being Canadian means that I am someone who passionately wants a better environment for the next generation, and someone who has spent my career as an engineer working to help deliver innovative solutions across the renewable energy industry sector. It's through ecoinnovate projects that I realize the daunting challenge and opportunity we face when it comes to the energy transition.

As the principle leader of Mariposa, I am held accountable for a lot of numbers, many of them financial. However, our quarterly financials aren't the only numbers I am ultimately going to be judged against. It is what we do about the approximately 800 million people without access to reliable and affordable electricity today; how we keep pace with the global electricity demand projected to grow by 50% in the next 20 years; and how we decarbonize the power sector and strengthen its resilience simultaneously.

This is why at Mariposa, we're leading a decade of action on climate change and sustainable energy development. If we act now, we can effectively address the climate crisis and provide more efficient, affordable, and reliable electricity for all Canadian cities and communities. Let's together make a measurable difference".
